

QUESTION BANK - MODULE 2

Course: BCS402 - Microcontrollers

Module Title: ARM Instruction Set and Programming

Course Outcome: CO2: Develop programs using ARM instruction set.

Q.No	Question	Marks	CO	RBT Level
1	Explain data processing instructions with examples.	7	CO2	L2
2	Explain branch instructions with examples.	6	CO2	L2
3	Write ARM program to find factorial of a number.	10	CO2	L3
4	Explain barrel shifter operations.	7	CO2	L2
5	Write ARM program to add first 10 integers.	10	CO2	L3
6	Explain multiply and multiply-accumulate instructions.	6	CO2	L2
7	Explain logical instructions supported in ARM.	5	CO2	L2
8	Explain compare instructions in ARM.	5	CO2	L2
9	Write short note on software interrupt instruction.	5	CO2	L1
10	Explain CPSR instruction operations.	7	CO2	L3
