

QUESTION BANK - MODULE 2

Course: BCS402 - Microcontrollers

Module Title: ARM Instruction Set and Programming

Course Outcome: CO2: Apply ARM assembly language programming concepts.

Q.No	Question	Marks	CO	RBT Level
1	Explain ARM instruction set and data processing instructions.	7	CO2	L2
2	Explain branch and control instructions.	6	CO2	L2
3	Explain barrel shifter with examples.	7	CO2	L3
4	Explain multiply and multiply-accumulate instructions.	6	CO2	L2
5	Write ARM program for addition of two 32-bit numbers.	10	CO2	L4
6	Write ARM program to find largest number in an array.	7	CO2	L4
7	Explain conditional execution in ARM.	5	CO2	L2
8	Explain status flags in ARM.	5	CO2	L2
9	Write ARM program for factorial.	10	CO2	L4
10	Explain immediate and register operands.	5	CO2	L2
